Vijayawada, Andhra Pradesh

WHO WE ARE

About Arohaanex Edvantage

Arohaanex Edvantage helps schools, teachers and students get more from learning. We combine careful academic planning, practical teaching resources and honest career guidance, so that every classroom runs on a clear plan and every student has a clear next step.

Our name carries our promise: **Ascend with Advantage**. We help schools and students climb steadily, one clear step at a time.

What we believe

Understanding before speed	Concepts are learned best through examples students recognise. Practice comes after understanding.
Assessment should guide improvement	Short checks before and after a topic show what to reteach, support or extend, so that marks lead to action.
Teachers grow through structure and support	Regular, collaborative reviews adjust plans early and help teachers, rather than catching them out.
Parents are partners	Well-organised meetings and simple practices at home build trust and help children who need extra support.
Technology serves learning	We use it to make materials more consistent and of better quality, always with a clear academic purpose.

Based in Vijayawada, Andhra Pradesh	**Works with** Schools, teachers, students and parents	**Curricula** CBSE and state-board syllabi	**Languages** English, Telugu and Hindi

The gaps we help schools close

Weak foundations Reading and maths below grade level in the early classes	**Teacher support** Training, planning formats and coaching	**Assessment pressure** Clear policy, better papers and useful analysis
Retention Early warning and guidance before Classes 8 to 10	**Paperwork** Calendars, records and compliance routines	**Communication** Parent meetings and reporting that build trust

THREE SERVICES, ONE PURPOSE

What we offer

For Schools: academic support partner

We find where learning falls short, plan the fix, train teachers and track progress.

- Baseline tests and remedial support for reading and maths in Classes 3 to 8
- Lesson plan formats, teacher training, observation rubrics and coaching
- Assessment policy, blueprints, question papers and analysis of results
- Academic calendars, record templates and compliance checklists
- Early-warning lists for dropout, and career guidance for Classes 9 to 12
- Parent communication, and referral routes for learning differences and wellbeing

Educator Hub: help for teachers, on request

Teachers tell us what they need, and we prepare it and share the finished documents within 24 hours.

- Lesson plans, question papers with marking schemes, PPTs and teaching aids
- Assessments, rubrics and remedial worksheets
- Student performance analysis from anonymised marks
- Project and activity ideas, and planning for exhibitions and science fairs
- Monthly and yearly plans for teachers, and group plans for schools

Student Corner (Ascend Hub): guidance for students and parents

A web app at ascend.arohaanex.com.

- Career Guidance: an interest quiz, then streams, courses, careers and NAAC-graded colleges, for students after Class 10 and after Class 12
- Study Abroad: choose a country, then see opportunities, entrance exams and money, with scholarships and recent visa changes
- The quiz shows interests, not ability. It is a starting point for a conversation, and not a psychometric test

OUR APPROACH

How we work with a school

STEP 1
Understand
Records, baseline tests and classroom observation, so we start from facts.

STEP 2
Plan
A clear 90-day plan agreed with your leadership team.

STEP 3
Equip and train
Ready-to-use plans, papers and worksheets, and training to use them.

STEP 4
Track and review
We re-test, review results with you and adjust the plan.

Ways to work with us

Every school is different. We suggest what fits after we understand yours.

Academic Health Check
A clear picture of where your school stands

- A review of academic records and baseline tests in sampled classes
- Classroom observation and a written report
- A 90-day action plan

Academic Partner
Steady support through the school year

- Monthly planning support and a library of lesson plans, papers, PPTs and assessments
- Teacher training sessions and analysis after every exam
- A quarterly review with your leadership team

Whole-School Programme
Deeper support over several years

- Everything in Academic Partner, plus on-site coaching and a remedial programme for foundational skills
- A parent programme, career guidance for Classes 9 to 12, and leadership mentoring

Not sure where to begin? We can start with a short pilot in one or two classes: a baseline test, a remedial block and teacher coaching, with a clear before-and-after.

WHAT YOU CAN EXPECT

Progress and responsibility

How we measure progress

- Baseline and end-of-year scores on the same test
- How many children move up a reading or maths level
- Teacher observation scores and the quality of exam papers
- Attendance and dropout, and the time teachers save on planning

We aim to improve how a school teaches and checks learning. We do not promise board results.

How we work responsibly

- **Qualified teachers review our work.** We use AI tools to speed up preparation, and a qualified subject teacher checks every document before it reaches your school.
- **Student privacy.** We ask for roll numbers or codes, not names, and only with your school's written permission.
- **Original content.** We create our own material and fit it to your board and syllabus.
- **Specialist needs.** For learning difficulties and counselling, we refer to qualified professionals.
- **Agreed scope.** The scope of work for each school is agreed in writing before work begins.

A typical first year

Month 1	Gather records and run baseline tests.
Months 2 to 3	Fix the calendar and templates, start training and remedial groups.
Months 4 to 6	Coaching visits, the first analysis of results, and parent communication.
Months 7 to 9	A second assessment, adjustments, and career guidance for older classes.
Months 10 to 12	An end-of-year test, a progress report and a plan for next year.

THE PERSON BEHIND AROHAANEX EDVANTAGE

Meet Santosh Adivi

Santosh Adivi has spent more than twenty years in mathematics education across CBSE and state-board curricula: teaching mathematics from Class 8 to junior-college level, designing assessment frameworks, policies, question papers and answer keys, preparing academic calendars, year plans and unit plans with regular reviews, supporting teachers and parents, and authoring an IIT Foundation Mathematics book series for Classes 6 to 10. He holds an M.Sc. in Mathematics, a B.Ed. in Mathematics and English and a B.A. in Economics, Mathematics and Statistics, and has completed the Teach to Achieve certification in pedagogy, classroom management and technology-integrated teaching. He believes that assessment should guide improvement, not merely judge.

CONTACT

Let us talk

Tell us about your school, your classroom or your child's next step. We will get in touch to understand what you need.

Address	Door No. 17-18, No. 211, Sky Towers, Murali Nagar, Vijayawada, Andhra Pradesh 520007
Phone and WhatsApp	+91 9542223383
